

Galvanized Scaffolding Frame Joint Pin Accessories Corrosion Resistant for Building Construction

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: bythai
- Certification: SGS,ISO
- Model Number: BT209
- Minimum Order Quantity: 1000
- Price: 4.5-8.5
- Packaging Details: container
- Delivery Time: 10-15
- Payment Terms: L/C, T/T

Product Specification

- Application: Building
- Color: Silver
- Height: 2m
- Length: 1m
- Load Capacity: 1000kg
- Material: Steel
- Packaging: Carton
- Shape: Square
- Size: Customized
- Surface Treatment: Galvanized
- Thickness: 2mm
- Usage: Construction
- Weight: 2.5kg
- Width: 1m
- Highlight: **Construction Scaffolding Frame Accessories.**

Product Description

Scaffolding Frame Accessories Corrosion Resistant for Building Construction

Application	Building	Color	Silver
Height	2m	Length	1m
Load Capacity	1000kg	Material	Steel
Packaging	Carton	Shape	Square
Size	Customized	Surface Treatment	Galvanized
Thickness	2mm	Usage	Construction
Weight	2.5kg	Width	1m

Enhance stability: Accessory products can increase the stability and structural strength of the scaffold, ensuring that there is no shaking and instability when working at heights, and providing a safe and reliable working platform.

Improve safety: Accessory products can strengthen the connection points and support points of the scaffolding, reduce the risk of accidents, and ensure the safety of construction workers.

Optimize functionality: Accessory products can increase the functionality of scaffolding, such as installing handrails, protective nets, tool racks, etc., to improve work efficiency and comfort.

Strong adaptability: The design of accessories is flexible and can be applied to different types and specifications of scaffolding systems to meet the needs of different construction projects.

Durable and reliable: Accessory products are made of high-quality materials and are durable and long-life, able to withstand long-term construction use.

Main accessory types:

Connectors: Including connecting hooks, connecting pins, etc., used to connect the frame and components of the scaffold to enhance the firmness of the connection.

Support parts: Such as support rods, support seats, etc., used to enhance the support force of the scaffold and ensure stability and safety.

Protective facilities: Including handrails, protective nets, safety doors, etc., used to provide safety protection and protective measures for workers.

Other accessories: such as wheels, adjusting feet, tool racks, etc., used to improve the mobility, adjustability and functionality of the scaffold.

Application scope:

Scaffolding frame accessories are widely used in various construction projects such as construction sites, decoration sites, and bridge maintenance, providing important support for the assembly, use, and maintenance of scaffolding systems.
