

6m Length Galvanised Steel Scaffold Tube 3.2mm Thickness Sturdy Construction Material

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: \$5-\$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Name: Galvanised Scaffold Tube
- Thickness: 3.2mm
- Yield Strength: 245N/mm2
- Weight: 6.4kg/m
- Standard: EN39
- Bending Radius: >2.5D
- Length: 6m
- Tensile Strength: 420N/mm2

Product Description

Product Description:

Galvanised Scaffold Tube is a type of metal scaffolding piping made from galvanised steel which offers superior strength and durability. It is designed for use in industrial and construction settings. The steel scaffold tube is coated with a protective zinc layer which prevents corrosion and rusting, making it an ideal choice for outdoor use. This galvanised steel scaffold tube has an impressive tensile strength of 420N/mm², a yield strength of 245N/mm² and an elongation of over 20%, making it one of the most reliable and robust types of scaffold piping available. The thickness of the galvanised steel scaffolding tube is 3.2mm, making it lightweight and easy to handle. Galvanised Scaffold Tube is a cost-effective solution for all types of scaffolding projects and is an excellent choice for any job requiring rust and corrosion resistance.

Features:

Product Name: **Galvanised Scaffold Tube**

Corrosion Resistance: **Excellent**

Yield Strength: **245N/mm²**

Diameter: **48.3mm**

Name: **Galvanised Metal Scaffolding Tube**

Tensile Strength: **420N/mm²**

Technical Parameters:

Property	Value
Elongation	>20%
Yield Strength	245N/mm ²
Weight	6.4kg/m
Tensile Strength	420N/mm ²
Standard	EN39
Material	Galvanised Steel
Surface Treatment	Galvanised
Length	6m
Diameter	48.3mm
Thickness	3.2mm

Applications:

Bythai Scaffolding Galvanised Steel Scaffold Tube (Model Number: BT01) is a high-quality galvanised metal scaffolding tube from China certified by SGS. It provides excellent corrosion resistance and its thickness is 3.2mm. It is 48.3mm in diameter and 6m in length, with an elongation rate of more than 20%. The price range for Bythai Scaffolding Galvanised Steel Scaffold Tube is between \$5 and \$18, and it can be packaged in bundles. The delivery time is 7-15 days after payment is done via TT/LC, and the supply ability is 1000tons per month.

Customization:

Galvanised Steel Scaffold Tube

Brand Name: **Bythai Scaffolding**

Model Number: **BT01**

Place of Origin: **China**

Certification: **SGS**

Price: **\$5-\$18**

Packaging Details: **In bundles**

Delivery Time: **7-15 days**

Payment Terms: **TT/LC**

Supply Ability: **1000tons per month**

Application: **Scaffolding**

Weight: **6.4kg/m**

Length: **6m**

Surface Treatment: **Galvanised**

Corrosion Resistance: **Excellent**

Our Galvanised Steel Scaffold Tube is a reliable and robust product that is ideal for industrial and commercial applications. It is manufactured to the highest quality standards and is designed to provide excellent corrosion resistance against harsh weather and environmental conditions. Our Galvanised Steel Scaffold Tube is lightweight, durable and easy to install, making it perfect for a variety of uses. It is also extremely cost-efficient and comes with a range of lengths and sizes to suit your needs.

Packing and Shipping:

Galvanised Scaffold Tube packaging and shipping:

The Galvanised Scaffold Tube is packaged in a corrugated cardboard box. Each tube is individually wrapped in bubble wrap to prevent any damage to the product during shipping. The cardboard box is then sealed with tape and labeled with the shipping address. The box is then placed into a larger cardboard box with the appropriate packing materials to ensure a safe delivery of the product. The box is then loaded onto a truck for delivery to the customer.

FAQ:

Q1: What is the brand name of the Galvanised Scaffold Tube?

A1: The brand name of the Galvanised Scaffold Tube is Bythai Scaffolding. **Q2: What is the model number of the Galvanised Scaffold Tube?**

A2: The model number of the Galvanised Scaffold Tube is BT01. **Q3: Where is the Galvanised Scaffold Tube manufactured?**

A3: The Galvanised Scaffold Tube is manufactured in China. **Q4: Does the Galvanised Scaffold Tube have a certification?**

A4: Yes, the Galvanised Scaffold Tube has a SGS certification. **Q5: What is the price range of the Galvanised Scaffold Tube?**

A5: The price range of the Galvanised Scaffold Tube is from \$5 to \$18.
