Product Description

Product Description:

Scaffolding Coupler

Scaffolding coupler from our company is made from high quality galvanized steel which has been certified with ISO9001. With the strong galvanized surface treatment, it is highly resistant to corrosion and rust, providing a long-term durability.

This right angle coupler has been designed to join scaffolding tubes at any angle and ensures a strong and secure connection between them. The coupler is made from galvanized steel, which makes it strong and sturdy, making it perfect for any scaffolding applications. The coupler is designed for easy installation and its galvanized steel material provides excellent strength and durability. It is ideal for use in any scaffolding and construction projects. We guarantee that our product is of the highest quality with each one being certified with ISO9001.
