

Painted Color American Frame Quick and Effortless Installation

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Model Number: BT04

Product Specification

- Reusability: Yes
- Material: Steel
- Durability: High
- Weight: Lightweight
- Color: Steel, Painted Color
- Safety: High
- Stability: High
- Load Capacity: High

Product Description

Product Description:

Frame System Scaffolding is a high-strength and highly-stable h frame scaffold system designed for use in a variety of construction sites. With customizable size and high safety, the scaffold is made of powder-coated steel frame and equipped with ladder frame for flexibility. The system is designed to offer maximum stability and safety for workers, enabling them to do their work with ease and safety. The powder coating provides strong protection against corrosion and other environmental factors. The system also comes with a variety of accessories, such as adjustable levelers, wheels, and handrails, making it easy to configure and customize to the specific needs of the job site. With its flexible design and high stability, Frame System Scaffolding is an ideal choice for any construction project.

Features:

Frame System Scaffolding High Reusability, Powder Coating Surface Treatment, Customized Size, Easy Installation, High Flexibility.
H Scaffold System High Reusability, Powder Coating Surface Treatment, Customized Size, Easy Installation, High Flexibility.
Scaffold Mobile Frame High Reusability, Powder Coating Surface Treatment, Customized Size, Easy Installation, High Flexibility.
Scaffolding Access Frame High Reusability, Powder Coating Surface Treatment, Customized Size, Easy Installation, High Flexibility.
Scaffolding System High Reusability, Powder Coating Surface Treatment, Customized Size, Easy Installation, High Flexibility.

Technical Parameters:

Attribute	Value
Durability	High
Color	Steel, Painted Color
Easy Dismantling	Yes
Surface Treatment	Powder Coating
Load Capacity	High
Safety	High
Reusability	Yes
Easy Installation	Yes
Cost-effectiveness	Yes
Weight	Lightweight

Applications:

Bythai BT04 Frame System Scaffolding

Bythai BT04 Frame System Scaffolding is cost-effective and highly efficient. It is widely used in many fields, such as construction, industrial, shipbuilding, and more. It is made of high-grade materials and can be customized to different sizes. It provides high load capacity and reliability, which makes it an ideal choice for scaffolding. It's also reusable, which helps reduce waste and makes it an environmentally-friendly option. With its high safety standards, it can provide a safe working environment for construction workers. Bythai BT04 Frame System Scaffolding is a perfect choice for scaffold mobile frame, h scaffold system, and frame system structuring projects. It is versatile and can be used for indoor and outdoor projects. It's easy to assemble and disassemble, which can save a lot of time and energy. It is also lightweight and can be moved easily. It can be used for commercial and residential projects. With its high load capacity, it can be used to support heavy loads and can withstand a wide range of weather conditions.

Bythai BT04 Frame System Scaffolding is an effective and reliable scaffolding solution. It can provide a safe working environment while also being cost-effective and highly efficient. It is perfect for any project, whether it's for industrial, commercial, or residential use.

Customization:

Bythai BT04 Frame System Scaffolding

Our Bythai BT04 Frame System Scaffolding is designed to produce a mobile frame scaffold system for various applications. It is built with a high load capacity and features an easy installation and dismantling system, making it a cost-effective and efficient scaffold system. The surface is treated with powder coating for a durable finish.

Features:

Brand Name: Bythai

Model Number: BT04

Place of Origin: China

Easy Installation: Yes

Easy Dismantling: Yes

Surface Treatment: Powder Coating

Load Capacity: High
Cost-effectiveness: Yes

Support and Services:

Frame System Scaffolding Technical Support and Services

24/7 technical support for Frame System Scaffolding products.
A wide range of resources available for troubleshooting and problem-solving.
Regular maintenance and updates to ensure optimal performance.
Dedicated customer service team to assist with any inquiries.
Online tutorials and documentation to help users get up and running quickly.
