

Q235 High Safety American Frame Powder Coating Scaffolding System

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Model Number: BT04

Product Specification

- Load Capacity: High
- Durability: High
- Material: Steel
- Stability: High
- Reusability: Yes
- Safety: High
- Flexibility: High
- Size: Customized
- Highlight: **Customized Frame Powder Coating, Ladder Frame Powder Coating**

Product Description:

Frame System Scaffolding

Frame System Scaffolding is an efficient and cost-effective solution for any construction or renovation project. It is a walk-through scaffold system that is made of high-quality steel, making it durable and stable. The size and color of the Frame System Scaffolding can be customized to meet the specific needs of the project. The steel components can be painted with any desired color to match the surrounding environment. The Frame System Scaffolding is a perfect choice for any construction or renovation project that requires a secure, walk-through scaffold mobile frame. With its high stability and durability, the Frame System Scaffolding is an ideal choice for any project that needs an effective scaffolding frame system.

Features:

Product Name: Frame System Scaffolding

Reusability: Yes

Stability: High

Size: Customized

Surface Treatment: Powder Coating

Material: Steel

Special Features: Ladder Frame, H Scaffold System, Walk Through Scaffold System

Technical Parameters:

Attributes	Specifications
Load Capacity	High
Weight	Lightweight
Safety	High
Flexibility	High
Material	Steel
Size	Customized
Surface Treatment	Powder Coating
Stability	High
Durability	High
Cost-effectiveness	Yes
Frame System	Ladder frame
Scaffolding System	Walk through scaffold system for construction

Applications:

Bythai BT04 Frame System Scaffolding

Bythai BT04 frame system scaffolding provides a fast, safe and flexible walk through scaffolding system. The American Frame System is designed with high stability, durability and reusability, and is available in steel and painted color. It is a perfect choice for all types of construction and renovation projects.

Brand Name: Bythai

Model Number: BT04

Place of Origin: China

Flexibility: High

Durability: High

Reusability: Yes

Color: Steel, Painted Color

Stability: High

Bythai BT04 frame system scaffolding provides a convenient platform for all types of construction and renovation projects, such as roofing, flooring, and painting. The frames are lightweight and can be easily assembled and disassembled, while the steel and painted color options make them suitable for any environment. The American Frame System is designed with high stability, durability and reusability, making it ideal for any job, big or small.

Bythai BT04 frame system scaffolding is the perfect choice for any construction or renovation project. With its high flexibility, durability, reusability and stability, it is a reliable and cost-effective solution that will help you get the job done quickly and safely.

Customization:

Bythai BT04 Frame System Scaffolding

The Bythai BT04 Frame System Scaffolding is a reliable and durable construction scaffolding system that is lightweight and highly flexible. It utilizes a ladder frame structure for a stable connection, making it a great choice for any construction project. It is highly durable and offers superior safety for users, and can be reused multiple times.

Support and Services:
