Packing and Shipping:

Packaging and Shipping Scaffolding Ladders

Scaffolding ladders come in a variety of sizes and shapes, and they must be packaged and shipped with care. The following steps should be taken to ensure that the ladders are properly packaged and shipped:

Choose the right packaging materials. Use bubble wrap, foam, and other materials to protect the ladders from damage during shipping.

Measure the ladders to determine the size of the packaging needed. Choose a box or other container that is large enough to accommodate the ladder.

Place the ladder in the box or container, making sure to cover any sharp edges with protective materials.

Fill any gaps in the packaging with additional cushioning materials to prevent the ladder from shifting during shipping.

Securely close the box or container with tape or straps.

Label the package with the appropriate shipping information.

Ship the package using the appropriate carrier.
