

Tensile Strength Galvanised Scaffold Tube With 6m Length EN39 Standard

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: \$5-\$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Standard: EN39
- Weight: 6.4kg/m
- Application: Scaffolding
- Length: 6m
- Yield Strength: 245N/mm²
- Material: Galvanised Steel
- Elongation: >20%
- Tensile Strength: 420N/mm²
- Highlight: **6m Length Galvanised Scaffold Tube, EN39 Galvanised Scaffold Tube, Galvanised Welding Scaffold Pipes**

Product Description

Product Description:

Galvanised Scaffold Tube is made of hot-dipped galvanised steel, which is used for scaffolding systems. It has superior corrosion resistance and anti-rust property, ensuring its long service life. The tube is 48.3mm in diameter and 3.2mm in thickness, and meets the standard of EN39. It has a yield strength of 245N/mm², which is much higher than the average strength of other scaffolding tubes. Galvanised Scaffold Tube is an ideal choice for various scaffolding systems, providing a safe and reliable solution for construction and engineering projects.

Features:

Product Name: Galvanised Scaffold Tube
Thickness: 3.2mm
Surface Treatment: Galvanised
Name: Galvanised Scaffold Tube
Application: Scaffolding
Weight: 6.4kg/m
Material: Q195 scaffolding tubes and pipes
Scaffold Tube Caps: GI pipe

Technical Parameters:

| Property | Value |
|-------------------|----------------------|
| Diameter | 48.3mm |
| Surface Treatment | Galvanised |
| Yield Strength | 245N/mm ² |
| Weight | 6.4kg/m |
| Elongation | >20% |
| Standard | EN39 |
| Bending Radius | >2.5D |
| Application | Scaffolding |
| Length | 6m |
| Tensile Strength | 420N/mm ² |

Applications:

Bythai Scaffolding is a leading supplier of galvanised scaffold tube, specifically model BT01. This product is made of high-grade galvanised steel which has been hot-dipped to ensure maximum strength and durability. It is certified by SGS, with a yield strength of 245N/mm², an elongation of >20%, and is compliant with EN39 standards. This tube is especially suited for scaffolding due to its superior strength and its light weight, making it easier to transport and assemble. It is also highly economical, with prices ranging from \$5 to \$18 per bundle. It is available in STK 500 pipes and can be delivered within 7-15 days of purchase, with payment options of TT or LC. We have a supply capacity of 1000 tons per month.

Bythai Scaffolding's galvanised scaffold tube is the perfect product for any scaffolding job. It is durable and reliable, and the hot-dipped galvanised steel ensures that it is corrosion-resistant and long-lasting. It is also lightweight and easy to transport and assemble, making it an ideal choice for scaffolding projects. The excellent price point and fast delivery time make it an even more attractive option for customers.

Support and Services:

Galvanised Scaffold Tube Technical Support and Service:

We provide full technical support and service for our galvanised scaffold tube products. Our experienced team is available to help you choose the right product for your project, answer any questions you may have and help you with any installation and maintenance issues. We also provide a wide range of accessories for our galvanised scaffold tube products. These include brackets, couplers and accessories to ensure that you have everything you need to complete your project.

Our team is available to provide guidance and advice on any product related enquiries. We are committed to providing excellent customer service and will do our best to ensure your project is completed to the highest standard.

Packing and Shipping:

Galvanised Scaffold Tube Packaging and Shipping:
The tubes are individually wrapped in waterproof packaging material.
The tubes are placed in wooden boxes or crates.
The wooden boxes or crates are securely sealed.
The tubes are shipped on pallets, by truck, rail or sea.
