

Hot-dip Galvanized Ringlock System Scaffolding for Architecture

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM202
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Warranty: 2 Years
- Product Name: Ringlock System
- Material: Q235 Steel
- Application Scenarios: Architecture
- Surface Treatment: Hot-dip Galvanized
- Shipping Origin: China

Product Description

Product Description:

Ringlock System Scaffolding

The Ringlock System is a high-quality scaffold connector designed for construction scaffolding. It is a modular scaffolding system that offers versatility, strength, and durability for various construction projects.

Originating from China, this scaffolding system has been widely used in architecture projects due to its reliability and superior performance.

The Ringlock System is made with hot-dip galvanized surface treatment, ensuring its resistance to rust and corrosion. This makes it suitable for both indoor and outdoor use, providing a long-lasting and safe scaffolding solution.

Key Features:

Quality Scaffold Connector: The Ringlock System features a high-quality scaffold connector known as the ringlock rosette. This rosette is designed to connect the scaffold standard to the ledger, providing a strong and secure connection.

Modular Scaffolding: The Ringlock System is a modular scaffolding system, which means it can be easily assembled and disassembled according to the specific needs of a construction project. This makes it a versatile and efficient solution for various construction scenarios.

Superior Strength: The Ringlock System is built with strength in mind. Its unique design and use of high-grade materials ensure its ability to support heavy loads and withstand harsh weather conditions.

Durability: With hot-dip galvanized surface treatment, the Ringlock System is highly durable and can withstand the test of time. It requires minimal maintenance, making it a cost-effective solution for long-term use.

Warranty:

The Ringlock System comes with a 2-year warranty, providing customers with peace of mind and assurance of its quality and reliability.

Application Scenarios:

The Ringlock System is primarily used in architecture projects, such as building construction, renovation, and maintenance. Its versatility and strength make it suitable for various construction scenarios, including high-rise buildings, bridges, and industrial structures.

It can also be used in other applications, such as event scaffolding, scaffolding towers, and support structures for temporary installations. Overall, the Ringlock System is a reliable, efficient, and versatile scaffolding solution that meets the demands of modern construction projects. With its quality scaffold connector, modular design, and durable construction, it is a top choice for contractors and builders around the world.

Technical Parameters:

Technical Parameters	Value
Product Name	Ringlock System

Warranty	2 Years
Surface Treatment	Hot-dip Galvanized
Material	Q235 Steel
Application Scenarios	Architecture
Shipping Origin	China
Quality Scaffold Connector	High quality, durable and reliable
Hot Dip Galvanized Ringlock	Provides rust and corrosion resistance for long-lasting use
Soporte Diagonal Ringlock	Sturdy and stable support for various construction projects

Applications:

Ringlock System Scaffolding

Brand Name: Bythai
Model Number: BM202
Place of Origin: China
Certification: SGS
Price: 4.5-8.5
Packaging Details: In bundles
Delivery Time: 10-15
Payment Terms: TT/TC
Material: Q235 Steel
Product Name: Ringlock System
Surface Treatment: Hot-dip Galvanized
Application Scenarios: Architecture
Warranty: 2 Years

The Ringlock System Scaffolding, also known as the Cost-Effective Ring Lock System, is a highly versatile and efficient scaffolding solution offered by Bythai. It is designed to meet the various needs of construction projects, making it an ideal choice for both small and large-scale applications.

Innovative Ring Lock Design

The Ringlock System features a unique and innovative design that allows for easy assembly and dismantling. Its main components include vertical posts, horizontal ledgers, diagonal braces, and base collars, all of which can be quickly and securely connected using the patented Ringlock scaffold connectors. This makes it a preferred choice for projects with tight deadlines, as it significantly reduces the time and effort required for scaffolding erection.

High Quality Materials

Bythai's Ringlock System Scaffolding is made from high quality Q235 steel, ensuring its durability and stability. The steel undergoes a hot-dip galvanization process, making it resistant to rust and corrosion. This not only increases the lifespan of the scaffolding but also makes it suitable for use in harsh weather conditions.

Easy Assembly and Flexible Configuration

One of the key advantages of the Ringlock System is its easy assembly. The components can be quickly and easily connected, without the need for any specialized tools or equipment. This not only saves time but also reduces labor costs. Additionally, the system allows for flexible configuration, making it suitable for different types of structures and terrains.

Durable and Stable

The Ringlock System is designed to withstand heavy loads and provide a stable and secure working platform for workers. Its sturdy construction and high-quality materials ensure that it can withstand the rigors of construction work, making it a reliable and safe choice for any project.

Wide Application

The Ringlock System is a versatile scaffolding solution that can be used for a wide range of applications in the construction industry. It is suitable for use in building construction, bridge construction, shipbuilding, and other types of civil engineering projects. Its adaptability and flexibility make it an essential tool for any construction project.

Conclusion

Customization:

Customized Services for Ringlock System Scaffolding

Brand Name: Bythai
Model Number: BM202
Place of Origin: China
Certification: SGS
Price: 4.5-8.5
Packaging Details: In bundles
Delivery Time: 10-15 days
Payment Terms: TT/TC
Product Name: Ringlock System
Shipping Origin: China
Surface Treatment: Hot-dip Galvanized
Application Scenarios: Architecture
Material: Q235 Steel

Experience the convenience and efficiency of our Ringlock System Scaffolding for your construction needs. Contact us now for a personalized quote and let us help you build with confidence and safety.

Packing and Shipping:

Packaging and Shipping of Ringlock System Scaffolding

Ringlock system scaffolding is a popular and widely used scaffolding system in construction projects. It is known for its durability, versatility, and ease of use. To ensure the safe delivery of this product to our customers, we have a carefully planned packaging and shipping process.

Packaging Process

Before being packaged, each component of the ringlock system scaffolding is thoroughly inspected for any defects or damages. This ensures that our customers receive only high-quality and functional products.

The components are then carefully placed and organized in sturdy and durable packaging materials to prevent any damage during transit. The packaging is designed to withstand rough handling and transportation to ensure that the scaffolding components arrive in perfect condition.

Shipping Process

We offer various shipping options to our customers, including sea, air, and land transportation. Our experienced logistics team carefully plans and schedules the shipment to ensure timely delivery of the product.

To prevent any delays or damages during transit, the scaffolding components are securely loaded and unloaded from the transportation vehicles. Our team also keeps track of the shipment to provide updates to our customers about the status of their order.

Customs and Documentation

For international shipments, we take care of all the necessary customs and documentation procedures to ensure a smooth delivery process. Our team is familiar with the regulations and requirements of different countries, which helps in avoiding any delays or complications.

We also provide all the necessary documents and certificates, such as packing lists, commercial invoices, and certificates of origin, to facilitate customs clearance and ensure a hassle-free delivery to our customers.

At Ringlock System Scaffolding, we prioritize the safety and satisfaction of our customers. Our packaging and shipping process is designed to ensure that our customers receive their orders in perfect condition and on time. Trust us for all your scaffolding needs and experience the reliability and efficiency of our services.
