

Q355 Hot-dip Galvanized Ringlock System Scaffolding for Architecture

Our Product Introduction

for more products please visit us on bythaiscaffold.com

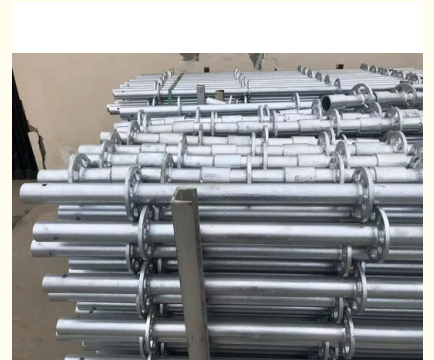

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM202
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

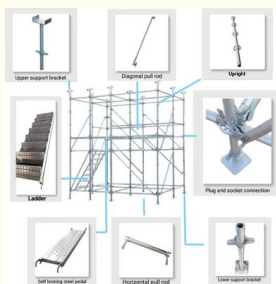

Product Specification

- Warranty: 2 Years
- Shipping Origin: China
- Product Name: Ringlock System
- Surface Treatment: Hot-dip Galvanized
- Application Scenarios: Architecture
- Material: Q235 Steel

Product Description:

Product Overview: Ringlock System Scaffolding

The Ringlock System Scaffolding is a high-quality scaffold connector that is designed to provide optimal support for construction projects. Made of Q235 steel, this advanced ringlock technology offers a durable and long-lasting solution for various scaffolding needs.

Surface Treatment

The Ringlock System Scaffolding goes through a hot-dip galvanizing process, which ensures a high level of corrosion resistance. This surface treatment protects the scaffold from harsh weather conditions, making it suitable for both indoor and outdoor use.

Shipping Origin

Our Ringlock System Scaffolding is manufactured in China, a country known for its high-quality steel products. This ensures that our customers receive top-notch scaffolding materials that meet international standards.

Warranty

We stand behind the quality of our products and offer a 2-year warranty for the Ringlock System Scaffolding. This reflects our confidence in the durability and reliability of our scaffolding.

Material

The Ringlock System Scaffolding is made of Q235 steel, a high-strength material commonly used in construction. This material has excellent load-bearing capacity and can withstand heavy loads, making it ideal for various construction projects.

Product Name

The Ringlock System Scaffolding is also known as the steel ringlock scaffolding, as it utilizes a unique ringlock design for maximum stability and safety.

Easy to Assemble

With its innovative ringlock design, the Ringlock System Scaffolding is easy to assemble and disassemble, making it a preferred choice for construction workers. This feature saves time and labor costs, increasing overall efficiency.

Versatile Use

The Ringlock System Scaffolding can be used for various construction projects, including building, renovation, maintenance, and repair work. Its flexible design allows for easy customization and adaptation to different job sites.

Durable and Long-lasting

The hot-dip galvanizing process and high-strength steel material make the Ringlock System Scaffolding highly durable and long-lasting. This reduces the need for frequent replacements, saving costs in the long run.

Stable and Safe

The Ringlock System Scaffolding offers exceptional stability and safety for construction workers. Its sturdy structure and advanced ringlock technology ensure a secure and stable working platform, minimizing the risk of accidents.

Cost-effective

The Ringlock System Scaffolding is a cost-effective solution for construction projects, as it offers a combination of high-quality materials, durability, and versatility at a competitive price.

Features:

Product Name: Ringlock System Scaffolding

Warranty: 2 Years

Shipping Origin: China

Application Scenarios: Architecture

Surface Treatment: Hot-dip Galvanized

Product Features:

Quality Scaffold Connector

Versatile Ringlock Scaffold

Innovative Ring Lock Design

Durable and Reliable

Easy Assembly and Disassembly

High Load Capacity

Corrosion Resistant

Cost-effective

Wide Range of Applications

Safe and Stable

Quick and Efficient Erection

Technical Parameters:

Product Name	Ringlock System
Application Scenarios	Architecture

Surface Treatment	Hot-dip Galvanized
Material	Q235 Steel
Shipping Origin	China
Warranty	2 Years
Product Description	This Ringlock System Scaffolding is made of high quality Q235 steel and is hot-dip galvanized for added durability. It is designed for use in architecture projects and is manufactured in China. With a 2-year warranty, it is a reliable and long-lasting solution for all your scaffolding needs. The key component, the Quality Scaffold Connector, ensures strong and secure connections for safe and efficient construction work.

Applications:

Ringlock System Scaffolding - The Ultimate Solution for your Scaffolding Needs

Are you looking for a reliable and efficient scaffolding system for your construction project? Look no further, Bythai's Ringlock System Scaffolding is here to meet all your needs! With its superior quality and advanced features, our BM202 model is the perfect choice for any construction site in the world.

Brand Name: Bythai

Bythai is a leading manufacturer of scaffolding products in China. We are known for our high-quality products, reliable services, and competitive prices. Our brand is trusted and preferred by construction companies, contractors, and builders all over the world.

Model Number: BM202

Our BM202 model is one of our most popular and versatile products. It is a part of our Ringlock System Scaffolding, which is designed to provide a safe, stable, and efficient working platform for construction workers. It is a modular scaffolding system that can be easily assembled and dismantled, making it perfect for both small and large-scale construction projects.

Place of Origin: China

All our scaffolding products, including the Ringlock System, are manufactured in our state-of-the-art factory in China. We have a team of skilled engineers and technicians who ensure that our products meet the highest standards of quality and safety.

Certification: SGS

Our Ringlock System Scaffolding has been certified by SGS, one of the most reputable and renowned testing, inspection, and certification companies in the world. This certification is a testament to the quality and reliability of our products.

Price: 4.5-8.5

At Bythai, we believe in providing our customers with the best value for their money. Our BM202 model is competitively priced at 4.5-8.5 per piece, making it an affordable and cost-effective option for all types of construction projects.

Packaging Details: In bundles

To ensure the safe and efficient transportation of our products, our Ringlock System Scaffolding is packaged in bundles. This not only protects the scaffolding during transit but also makes it easier to unload and store at the construction site.

Delivery Time: 10-15

We understand the importance of timely delivery in the construction industry. That's why we strive to deliver our products within 10-15 days after receiving the order. Our efficient production process and reliable logistics partners ensure that your scaffolding arrives on time.

Payment Terms: TT/TC

We offer flexible payment options to our customers, including TT (Telegraphic Transfer) and TC (Telegraphic Credit). This allows our customers to choose the payment method that is most convenient for them.

Warranty: 2 Years

At Bythai, we stand behind the quality of our products. That's why we offer a 2-year warranty on our Ringlock System Scaffolding. This gives our customers peace of mind knowing that they are investing in a durable and long-lasting product.

Surface Treatment: Hot-dip Galvanized

Our Ringlock System Scaffolding is hot-dip galvanized, which provides superior protection against corrosion and rust. This

ensures the longevity and durability of our products, making them suitable for use in various weather conditions.

Application scenarios: Architecture

The Ringlock System Scaffolding is designed for use in a wide range of construction projects, including architecture. Its modular design allows for easy customization and adaptation to different building designs and structures. It is suitable for both indoor and outdoor use, making it a versatile choice for any architectural project.

Shipping origin: China

Our Ringlock System Scaffolding is shipped directly from our factory in China. With our efficient logistics and transportation partners, we ensure that the scaffolding reaches your construction site safely and on time.

Product Name: Ringlock System

The product name says it all - the Ringlock System Scaffolding is a revolutionary scaffolding system that uses a ringlock connection method to provide superior stability, strength, and safety. It is a popular choice among construction professionals due to its versatility, efficiency, and ease of use.

Soporte Diagonal Ringlock

The Soporte Diagonal Ringlock is an important component of our Ringlock System Scaffolding. It is used to provide diagonal bracing, which increases the overall stability and strength of the scaffolding structure. Made from high-quality steel, our Soporte Diagonal Ringlock is durable and reliable.

Scaffold Coupler System

The Scaffold Coupler System is another key element of our Ringlock System Scaffolding. It is used to connect the horizontal and vertical components of the scaffolding, providing a secure and stable platform for workers. Our Scaffold Coupler System is designed to be easy to use, making the assembly and dismantling process quick and efficient.

Packing and Shipping:

Ringlock System Scaffolding Packaging and Shipping

Packaging:

The Ringlock System Scaffolding is packaged in a sturdy wooden crate to ensure safe transportation and storage.

Shipping:

The Ringlock System Scaffolding can be shipped by sea, air or land depending on the customer's preference and location. It is carefully packed and loaded onto the transportation vehicle to prevent any damage during transit. Our experienced logistics team ensures that the product is delivered in a timely and efficient manner to the destination specified by the customer.
