Product Description

Product Description:

Scaffolding Coupler

Scaffolding Coupler is a high-quality British coupler designed for connecting and securing scaffolding pipes. Made from durable Japanese steel, it is a safe and reliable option for scaffolding construction.

With its silver color and galvanized surface treatment, the Scaffolding Coupler not only looks sleek and professional, but it is also resistant to rust and corrosion. This ensures the longevity and durability of the product, making it a cost-effective choice for any construction project.

The Scaffolding Coupler is designed to meet the EN74-1 standard, ensuring its compatibility and safety with other scaffolding components. It is easy to install, making it a convenient choice for both professional and DIY construction projects.

Each Scaffolding Coupler is carefully packaged in a container, ensuring its protection during transportation and storage. This packaging also makes it easier to transport and store the couplers, saving time and effort during construction.

Overall, Scaffolding Coupler is a high-quality and reliable choice for scaffolding construction. Its use of high-quality British couplers and Japanese steel pipe connectors, along with its safe and easy installation, make it an essential component for any scaffolding project. Trust Scaffolding Coupler to provide a strong and secure foundation for your construction needs.

Scaffolding Coupler is a high-quality British scaffold fixture that is designed to connect two steel pipes together securely. This product, with its model number BM201, is manufactured in China Tianjin and has passed SGS certification, ensuring its superior quality and safety. Made from Japanese steel, this coupler provides superior strength and durability, making it a reliable choice for any construction project. Its galvanized surface treatment also adds an extra layer of protection against corrosion, increasing its lifespan and cost-effectiveness. Scaffolding Coupler is easy to install and can be used for various applications, making it a versatile choice for construction sites. Whether it's for building scaffolding, temporary structures, or even for hanging signage, this coupler can handle it all with ease. With its wide application range, this coupler is a must-have for any construction project. It ensures the safety of workers and provides a stable and sturdy support system. Its silver color also adds a professional touch to any structure. As a cost-effective option, Scaffolding Coupler is a popular choice among contractors and builders. It is competitively priced at 4.5-8.5 per piece, with a minimum order quantity of 1000 pieces. It is also packaged in bundles for easy handling and delivery. Choose Scaffolding Coupler for your next construction project and experience its superior quality, durability, and versatility. Its British design and Japanese steel make it a reliable and safe choice for all your scaffolding needs.
