

Container Package Coupler Scaffolding for Flexible Configuration

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Certification: SGS
- Model Number: BM201
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 15-25
- Payment Terms: TT/TC

Product Specification

- Name: Scaffolding Coupler
- Feature: High Strength
- Application: Construction
- Material: Steel
- Surface Treatment: Galvanized
- Package: Container
- Standard: EN74-1
- MOQ: 1000

Product Description

Product Description:

The Scaffolding Coupler is a necessary component in any construction project that utilizes scaffolding. Made from high quality British Scaffold Tube Clamps and Japanese Steel Pipe Connectors, this product is built to withstand the rigorous demands of construction work. The coupler is coated with a galvanized surface treatment, providing a layer of protection against corrosion and extending its lifespan. This makes it a durable and cost-effective solution for long-term construction projects.

One of the key features of the Scaffolding Coupler is its high strength. It is designed to securely connect scaffold tubes, providing stability and safety for workers on the scaffolding. This ensures that the scaffolding structure remains strong and stable, reducing the risk of accidents or collapses.

Compliant with the EN74-1 standard, this product meets the necessary safety requirements for scaffolding. It is also easy to install, making it a convenient and efficient choice for construction workers.

Investing in the Scaffolding Coupler means investing in the safety and efficiency of your construction project. Its high quality, durability, and ease of installation make it a valuable addition to any scaffolding system. Choose the Scaffolding Coupler for a strong and secure scaffolding structure.

Technical Parameters:

Item	Value
Standard	EN74-1
Material	Steel

Name	Scaffolding Coupler
Package	Container
Color	Silver
Application	Construction
MOQ	1000
Feature	High Strength
Surface Treatment	Galvanized
BS EN 74 Scaffold Accessories	Scaffold and Structure Connectors
Scaffold and Structure Connectors	Scaffolding Connector

Applications:

Scaffolding Coupler - Adapt to Any Construction Scenario

Product Details

Brand Name:	Scaffolding Coupler
Model Number:	BM201
Place of Origin:	China Tianjin
Certification:	SGS
Price:	4.5-8.5
Packaging Details:	In bundles
Delivery Time:	15-25 days
Payment Terms:	TT/TC
Surface Treatment:	Galvanized
Color:	Silver
Package:	Container
Name:	Scaffolding Coupler
MOQ:	1000 pieces

Application and Scenarios

Scaffolding Coupler, also known as scaffold clamp or scaffold clip, is an important component in construction projects. It is used to connect scaffolding pipes together, creating a stable and safe structure for workers to perform their tasks at various heights. Scaffolding Coupler is widely used in various scenarios, some of which include:

Building construction

Bridge construction

Tunnel construction

High-rise maintenance and repair

Temporary structures for events such as concerts and exhibitions

With its strong and reliable connection, Scaffolding Coupler can adapt to any construction scenario, providing a safe and efficient working environment for workers.

British Coupler Manufacturers

Scaffolding Coupler is a product that requires high quality and precision in its manufacturing process. As such, it is important to choose a reliable and reputable manufacturer. China Tianjin is known as a hub for British Coupler Manufacturers, with years of experience and expertise in producing high-quality British Scaffold Fixtures. These manufacturers follow the BS EN 74 standard, ensuring that their products meet the highest quality and safety standards.

BS EN 74 Scaffold Accessories

Scaffolding Coupler is just one of the many scaffold accessories that are essential for construction projects. Other BS EN 74 Scaffold Accessories include scaffold tubes, boards, ladders, and base plates. These accessories work together to form a complete scaffolding system, providing a safe and stable platform for workers to perform their tasks. With the right combination of accessories, a scaffolding system can be tailored to fit the unique needs and requirements of any construction project.

Customization:

Scaffolding Coupler Customization Service

Brand Name: Scaffolding Coupler

Model Number: BM201

Place of Origin: China Tianjin

Certification: SGS

Price: 4.5-8.5

Packaging Details: In bundles

Delivery Time: 15-25 days

Payment Terms: TT/TC

Standard: EN74-1

Application: Construction

MOQ: 1000 pieces

Name: Scaffolding Coupler

Surface Treatment: Galvanized

Our scaffolding coupler is the perfect solution for your construction needs. Made with high-quality materials and designed to meet the standards of EN74-1, our product is durable, reliable, and safe to use.

With our customizable service, we offer a wide range of options to fit your specific requirements. From size and shape to surface treatment and packaging, we can tailor our scaffolding coupler to meet your needs.

Our British Scaffold Tube Clamps are designed to securely connect scaffold tubes for a strong and stable structure. Our manual scaffold connection tools make assembly quick and easy, saving you time and effort on the job.

We also offer a scaffold clamping system that allows for easy adjustments and repositioning of the scaffolding as needed. This enhances safety and efficiency on the construction site.

Trust our Scaffolding Coupler to provide you with the best solution for your construction needs. Contact us today to learn more about our customization service and how we can help you achieve your project goals.
