

Aluminum Ringlock Scaffolding Standard Components for Locking Scaffolding

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: bythai
- Certification: SGS
- Model Number: BS204
- Minimum Order Quantity: 100
- Price: 4.5-8.5
- Packaging Details: container
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Features: High Strength, Easy To Assemble, Versatile, Durable, Corrosion Resistant, Lightweight, Cost-effective, Flexible, Safe, Stable, Efficient, Environmentally Friendly, Interchangeable, Adjustable, Multi-functional
- Size: Various Sizes Available
- Material: Aluminum
- Standard: EN12810, AS/NZS 1576, ANSI/SSFI SC100-5/05, BS1139
- Type: Ringlock
- Usage: Construction, Maintenance, Repair
- Components: Aluminum Ringlock Standard, Aluminum Ringlock Standard
- Oem: Available

Product Description

Product Description:

Aluminum Ringlock System

The Aluminum Ringlock System is a versatile and durable scaffolding system that offers high strength and easy assembly. It is designed to meet the needs of construction projects of various sizes, making it a popular choice for contractors and builders worldwide.

Type: Ringlock

Size: Various Sizes Available

Features: High Strength, Easy To Assemble, Versatile, Durable, Corrosion Resistant, Lightweight, Cost-effective, Flexible, Safe, Stable, Efficient, Environmentally Friendly, Interchangeable, Adjustable, Multi-functional

Application: Scaffolding System

OEM: Available

The Aluminum Ringlock System is known for its weather-resistant locking system, ensuring its stability and safety even in harsh weather conditions. The high-strength locking mechanism provides a secure and reliable structure for construction workers to work on. Its lightweight and interchangeable parts make it easy to assemble and adjust according to the project's needs, saving time and effort. Not only is the Aluminum Ringlock System cost-effective, but it is also environmentally friendly. Made from high-grade aluminum, it is corrosion resistant, making it a long-lasting and sustainable solution for scaffolding needs. Its versatility allows it to be used for various applications, such as building construction, bridge construction, and industrial maintenance.

Whether you are a small contractor or a large construction company, the Aluminum Ringlock System is an essential tool for any project. Its flexibility, safety, and efficiency make it a must-have for any construction site. Contact us today to learn more about this multi-functional and reliable scaffolding system.

Technical Parameters:

Technical Parameters	Value
Usage	Construction, Maintenance, Repair
Size	Various Sizes Available
Packing	Container
OEM	Available
Components	Aluminum Ringlock Standard,Aluminum Ringlock Standard
Features	High Strength, Easy To Assemble, Versatile, Durable, Corrosion Resistant, Lightweight, Cost-effective, Flexible, Safe, Stable, Efficient, Environmentally Friendly, Interchangeable, Adjustable, Multi-functional
Material	Aluminum
Type	Ringlock
Application	Scaffolding System
Standard	EN12810, AS/NZS 1576, ANSI/SSFI SC100-5/05, BS1139
Key Features	
Non-slip locking design	Yes
Lightweight locking system	Yes
Corrosion-resistant locking system	Yes

Applications:

Aluminum Ringlock System
Brand Name: bythai

Model Number: BS204
Place of Origin: China
Certification: SGS
Minimum Order Quantity: 100
Price Range: \$4.5-8.5
Packaging Details: Container
Delivery Time: 10-15 days
Payment Terms: TT/TC

Features:

High Strength: Made of high quality aluminum, the ringlock system is strong and durable, able to withstand heavy loads and rough construction environments.

Easy To Assemble: The ringlock system is designed for quick and easy assembly, saving time and labor costs on construction sites.

Versatile: With its modular design, the ringlock system can be used for various construction projects, including building, bridge, and tunnel construction.

Durable: The aluminum material is resistant to rust and corrosion, ensuring the longevity of the ringlock system even in harsh weather conditions.

Corrosion Resistant: The locking mechanism of the ringlock system is made of corrosion-resistant material, ensuring the safety of the locking system and preventing accidents.

Lightweight: Aluminum is a lightweight material, making the ringlock system easy to transport and maneuver on construction sites.

Cost-effective: The long lifespan and low maintenance requirements of the ringlock system make it a cost-effective choice for construction companies.

Flexible: The ringlock system can be adjusted to fit different construction needs, making it suitable for various types of projects.

Safe: The ringlock system is designed with safety in mind, ensuring the stability and security of the construction site.

Stable: The locking mechanism of the ringlock system provides a stable and secure connection between the components, ensuring the safety of workers and the stability of the structure.

Efficient: The ringlock system allows for fast and efficient construction, reducing construction time and costs.

Environmentally Friendly: Made of recyclable materials, the ringlock system is an eco-friendly choice for construction projects.

Interchangeable: The components of the ringlock system are interchangeable, allowing for easy replacement and repair.

Adjustable: The ringlock system can be adjusted to different heights and angles, making it suitable for various construction needs.

Multi-functional: The ringlock system can be used for various applications, including scaffolding, support, and shoring.

Components:

The Aluminum Ringlock System consists of:
Aluminum Ringlock Standard: Vertical component for support and connection.
Aluminum Ringlock Ledger: Horizontal component for support and connection.

Application:

The Aluminum Ringlock System is primarily used for scaffolding in construction projects such as building, bridge, and tunnel construction. It can also be used for support and shoring in various applications.

Type:

The Aluminum Ringlock System is a type of scaffolding system, known for its versatility, strength, and efficiency.

Packing:

The Aluminum Ringlock System is packed in containers for easy transportation and storage.

Customization:

bythai Aluminum Ringlock System Customization Service

Brand Name: bythai
Model Number: BS204
Place of Origin: China
Certification: SGS
Minimum Order Quantity: 100
Price Range: \$4.5 - \$8.5 per piece
Packaging Details: Container
Delivery Time: 10-15 days
Payment Terms: TT/TC
OEM: Available
Material: High-strength Aluminum
Type: Ringlock
Standard: EN12810, AS/NZS 1576, ANSI/SSFI SC100-5/05, BS1139
Application: Scaffolding System

Our Aluminum Ringlock System offers a highly efficient and flexible locking system design, providing easy assembly and disassembly for enhanced convenience. Our system is made of high-strength aluminum material, ensuring durability and reliability for all your scaffolding needs.

We offer customized sizes and specifications to meet the unique requirements of our clients. Our products are in accordance with international safety standards, providing a safe and secure working environment for workers at all times.

With our efficient delivery and logistics system, we guarantee timely delivery of your orders. Our team is committed to providing the best customer service and ensuring your satisfaction with our products.

Packing and Shipping:

Packaging and Shipping for Aluminum Ringlock System

The Aluminum Ringlock System is carefully packaged and shipped to ensure its safe arrival at your location. The following packaging and shipping methods are used:

Packaging:

The components of the Aluminum Ringlock System are individually packaged in high-quality, durable materials to prevent any damage during transportation.

All packages are labeled with the product name, quantity, and any special handling instructions.

For larger orders, components may be packaged on pallets or in crates for added protection.

Shipping:

The Aluminum Ringlock System can be shipped via sea, air, or land transportation, depending on your location and preference.

We work closely with reliable shipping companies to ensure timely and efficient delivery of your order.

For international orders, all necessary customs documentation and paperwork will be provided.

At Aluminum Ringlock System, we take great care in packaging and shipping our products to ensure they arrive in perfect condition. If you have any special packaging or shipping requirements, please let us know and we will do our best to accommodate your needs.
