

Galvanized Scaffolding Coupler High Strength and Durability Guaranteed

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Certification: SGS
- Model Number: BM201
- Minimum Order Quantity: 1000
- Price: 4.5-8.5
- Packaging Details: container
- Delivery Time: 15-25
- Payment Terms: TT/TC

Product Specification

- Color: Silver
- Surface Treatment: Galvanized
- Standard: EN74-1
- Package: Container
- MOQ: 1000
- Material: Steel
- Application: Construction
- Feature: High Strength
- Highlight: **EN74-1 Standard Scaffold Coupler ,
High Strength Scaffolding Coupler**

Product Description

Product Description:

Product Overview: Scaffolding Coupler

Features

British Coupler Manufacturers: Our scaffolding coupler is designed and manufactured by experienced and reputable British Coupler Manufacturers, ensuring the highest quality standards.

Scaffold and Structure Connectors: The coupler is designed to connect scaffold tubes and structures securely, providing a stable and safe construction environment.

BS1139 Standard Couplings: Our couplers are designed and tested to meet the BS1139 standard, ensuring that they are suitable for all types of scaffolding systems.

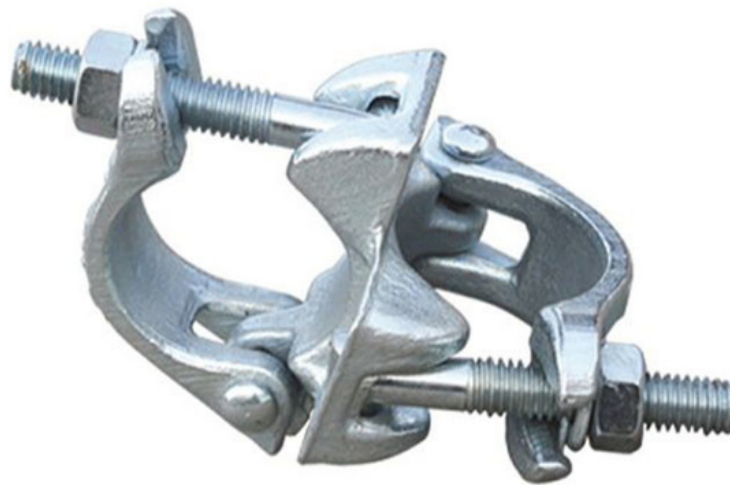

High Quality: Made from high-quality materials, our scaffolding coupler is built to withstand heavy loads and harsh weather conditions, ensuring durability and longevity.

Durable: Our couplers are designed to withstand constant use on construction sites, making them a reliable and cost-effective solution.

Easy to Install: The scaffolding coupler is designed for easy installation, reducing the time and effort required for scaffolding assembly.

Versatile: Our couplers are suitable for various types of scaffolding systems, making them a versatile and practical solution for any construction project.

Overall, our Scaffolding Coupler is a must-have for any construction project, providing a safe, durable, and versatile solution for connecting scaffold tubes and structures.

Technical Parameters:

Technical Parameter	Value
Product Name	Scaffolding Coupler
Minimum Order Quantity (MOQ)	1000
Material	Steel
Surface Treatment	Galvanized
Feature	High Strength
Color	Silver
Standard	EN74-1
Application	Construction
Package	Container
Key Features	Japanese Steel Pipe Connectors, Manual Scaffold Connection Tools, Steel Structure Scaffold Connectors, Galvanized Scaffolding Coupler

Applications:

Scaffolding Coupler

Brand Name: scaffolding coupler
Model Number: BM201
Place of Origin: china tianjin
Certification: SGS
Price: 4.5-8.5
Packaging Details: In bundles
Delivery Time: 15-25
Payment Terms: TT/TC
Surface Treatment: Galvanized
Name: Scaffolding Coupler
Standard: EN74-1
MOQ: 1000
Feature: High Strength
Introduction

Scaffolding Coupler is a type of Japanese Steel Pipe Connectors that are used to connect and secure British Scaffold Tube Clamps in construction projects. These British-style Scaffold Connectors are essential in scaffolding construction, providing a safe and reliable way to build structures.

Application and Scenario

Scaffolding Coupler is mainly used in building construction, providing a sturdy and durable support system for workers and materials. It is commonly used in the following scenarios:

High-rise buildings: Scaffolding Coupler is an essential component in the construction of high-rise buildings. It allows workers to access different levels of the building safely and efficiently, ensuring a smooth construction process.

Bridges and tunnels: Scaffolding Coupler is also widely used in the construction of bridges and tunnels. Its adjustable design allows for easy assembly and disassembly, making it ideal for projects that require frequent changes in height and angles.

Industrial and commercial structures: Scaffolding Coupler is commonly used in the construction of industrial and commercial structures such as factories, warehouses, and shopping malls. Its versatility and reliability make it a popular choice for these types of buildings.

Product Features

Safety: Scaffolding Coupler is made of high-quality Japanese steel, ensuring its strength and durability. It provides a secure connection between scaffold tubes, preventing accidents and ensuring the safety of workers.

Durability: With its galvanized surface treatment, Scaffolding Coupler is resistant to rust and corrosion, making it suitable for outdoor use. It can withstand harsh weather conditions, ensuring a long lifespan.

Easy Assembly: Scaffolding Coupler can be easily assembled and disassembled, making it convenient for construction projects that require frequent changes in height and angles. Its simple design allows for quick installation, saving time and labor costs.

Adjustable: Scaffolding Coupler can be adjusted to fit different sizes of scaffold tubes, providing versatility in various construction scenarios. It can also be angled to suit different angles and corners, making it a versatile and adaptable product.

Versatile: Apart from its use in building construction, Scaffolding Coupler can also be used in other industries such as shipbuilding, oil and gas, and event management. Its versatility makes it a valuable product in various fields.

Reliable: Scaffolding Coupler is certified by SGS and meets the standard EN74-1, ensuring its quality and reliability. It can withstand heavy loads and provide a stable and secure support system for construction projects.

Why Choose Scaffolding Coupler?

Scaffolding Coupler is your best choice for safe and durable construction due to its high-quality materials, adjustable design, and reliable features. With its Japanese steel construction and galvanized surface treatment, it provides a strong and long-lasting support system for your building project. Its easy assembly and versatility make it suitable for various construction scenarios, saving time and labor costs. Plus, its certification from SGS and compliance with EN74-1 standard ensures its quality and reliability, giving you peace of mind during construction.

Get Your Scaffolding Coupler Today

Scaffolding Coupler is available in bundles with a minimum order quantity of 1000 units. Its price ranges from 4.5 to 8.5, depending on the order quantity. With a delivery time of 15-25 days and payment terms of TT/TC, you can get your Scaffolding Coupler in no time and start your construction project with confidence. Contact us now to place your order and experience the safety, durability, and convenience of Scaffolding Coupler.

Customization:

Scaffolding Coupler - Customized Service

Brand Name: Scaffolding Coupler

Model Number: BM201

Place of Origin: China, Tianjin

Certification: SGS

Price: 4.5-8.5

Packaging Details: In bundles

Delivery Time: 15-25 days

Payment Terms: TT/TC

Product Details

Name: Scaffolding Coupler

Feature: High Strength

MOQ: 1000 pieces

Material: Steel

Color: Silver

Customized Design

Our Scaffolding Coupler is designed to meet your specific needs and requirements. We offer a range of customization options to ensure that the product perfectly fits your project.

High Quality

Our Scaffolding Coupler is made of high-quality steel, ensuring its strength and durability. It is designed to withstand heavy loads and harsh construction environments.

Competitive Price

We offer competitive prices for our Scaffolding Coupler without compromising on quality. Our aim is to provide you with the best value for your money.

Key Features

British-style Scaffold Connectors

BS EN 74 Scaffold Accessories

Japanese Steel Pipe Connectors

Packing and Shipping:

Packaging and Shipping for Scaffolding Coupler

Our Scaffolding Couplers are carefully packaged to ensure safe delivery to our customers. Each coupler is individually wrapped in plastic and then packed in a sturdy cardboard box. The box is then securely sealed to prevent any damage during transportation.

For larger orders, we use pallets to stack and secure the couplers for shipping. The pallets are then shrink-wrapped to provide additional protection during transit.

We offer various shipping options to meet our customers' needs. For domestic orders, we use reputable shipping companies with reliable delivery times. For international orders, we work closely with our logistics partners to ensure timely and cost-effective delivery.

Our packaging and shipping process is designed to minimize any potential damage and ensure that our customers receive their Scaffolding Couplers in perfect condition.
