

China Scaffolding Galvanized Scaffolding Beam Coupler EN74-1 Standard

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Certification: SGS
- Model Number: BM201
- Minimum Order Quantity: 100
- Price: 4.5-8.5
- Packaging Details: container
- Delivery Time: 15-25
- Payment Terms: TT/TC

Product Specification

- Surface Treatment: Galvanized
- Material: Steel
- Color: Silver
- Application: Construction
- Name: Scaffolding Coupler
- MOQ: 1000
- Standard: EN74-1
- Package: Container
- Highlight: **Galvanized Surface Steel Scaffolding Coupler, Customized Galvanized Scaffolding Coupler, EN74-1 Standard Scaffolding Connector**

Product Description:

Product Overview: Scaffolding Coupler

The Scaffolding Coupler, also known as the Universal Scaffold Clamping Tool, is an essential component in coupler scaffolding systems. This tool is designed to securely connect scaffolding tubes and beams, providing a strong and stable structure for construction and maintenance work.

The Scaffolding Coupler is made of high-strength galvanized steel, ensuring durability and longevity even in harsh working conditions. The surface treatment of galvanization not only adds an extra layer of protection against rust and corrosion, but it also gives the coupler a sleek silver color, making it easy to spot on the construction site.

The Scaffolding Coupler is specifically designed to provide a universal fit for all types of scaffolding systems. Its versatility allows it to be used with both steel and aluminum tubes, making it a cost-effective and efficient choice for construction projects of all sizes.

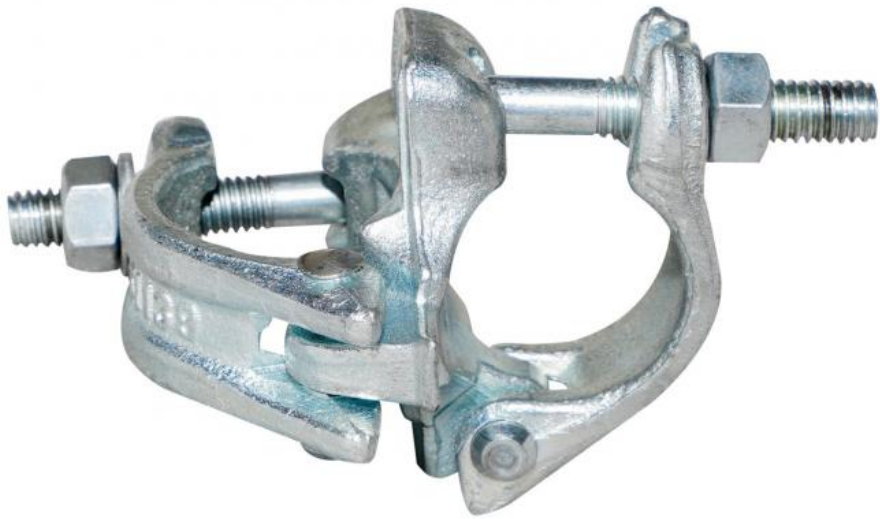

As a highly reliable and essential piece of equipment, the Scaffolding Coupler is packaged in containers for convenient transportation and storage. This ensures that the couplers are delivered to the construction site in excellent condition, ready to be used immediately.

The Scaffolding Coupler is known for its high strength and durability, making it an essential tool for any scaffolding system. Its sturdy design and secure grip on tubes and beams provide a strong and stable structure, giving workers the confidence to work at heights without any safety concerns.

In summary, the Scaffolding Coupler is a galvanized steel tool that is designed to connect scaffolding tubes and beams securely. Its universal fit, silver color, container packaging, and high-strength features make it an essential component in coupler scaffolding systems. Count on the Scaffolding Coupler for a reliable and sturdy scaffolding structure that ensures worker safety and efficiency on any construction site.

Technical Parameters:

Attribute	Value
Application	Construction
Color	Silver
Package	Container
Surface Treatment	Galvanized
Name	Scaffolding Coupler
Material	Steel
Feature	High Strength
MOQ	1000
Standard	EN74-1, BS1139 Standard Couplings
Key Words	British Scaffold Tube Clamps, Manual Scaffold Connection Tools

Applications:

The Scaffolding Coupler is a high-quality Japanese scaffold accessory used for connecting scaffolding parts and structures. It is made of strong and durable Japanese steel, making it a reliable and stable choice for any construction project.

With its easy installation process, the Scaffolding Coupler is suitable for a variety of construction applications, including building bridges, skyscrapers, and other large structures. It is also commonly used in home renovations and smaller scale projects.

Product Features

High-Quality Japanese Scaffold Accessories: The Scaffolding Coupler is made with top-grade Japanese steel, ensuring its strength and durability.

Scaffold and Structure Connectors: This product is designed to connect scaffolding parts and structures securely, providing stability and safety for workers.

Japanese Steel Pipe Connectors: The Scaffolding Coupler is made with Japanese steel pipes, known for their strength and durability.

Scaffolding Joint Clamp: This product features a joint clamp design, making it easy to connect scaffolding parts together.

Stable and Durable: The Scaffolding Coupler is designed to withstand heavy loads and harsh construction environments, ensuring its longevity and reliability.

Easy to Install: With its simple installation process, the Scaffolding Coupler can be quickly and easily set up, saving time and effort on construction sites.

Customization:

Scaffolding Coupler Customization Service

Brand Name: Scaffolding Coupler

Model Number: BM201

Place of Origin: China Tianjin

Certification: SGS

Price: \$4.5-8.5

Packaging Details: In bundles

Delivery Time: 15-25 days

Payment Terms: TT/TC

Product Description

Our scaffolding coupler, model BM201, is a high-quality and reliable steel structure scaffold connector. It is designed and manufactured to meet JIS standard couplings, making it suitable for various construction projects.

Customizable Service

At Scaffolding Coupler, we understand the unique needs of our customers. That's why we offer customizable services to meet your specific requirements. Our experienced team will work closely with you to create a personalized solution that fits your project perfectly.

Features

High strength

Durable

Corrosion-resistant

Easy to install
Surface Treatment

Our scaffolding coupler is hot-dipped galvanized to ensure maximum protection against rust and corrosion, making it suitable for both indoor and outdoor use.

Packaging and Delivery

Our scaffolding coupler is packaged in bundles to ensure safe and secure transportation. We offer prompt delivery within 15-25 days after order confirmation.

Payment Terms

We accept payment through TT (Telegraphic Transfer) or TC (Trade Credit) to provide a convenient and secure transaction process for our customers.

Get Your Customized Scaffolding Coupler Today

Contact us now to discuss your specific requirements and get a personalized solution for your project. Trust us to provide you with high-quality British scaffold tube clamps that meet your exact specifications.

We look forward to working with you!
