

## Silver Coupler Scaffolding The Ultimate Solution For Steel Structures Double Clamp

Our Product Introduction

for more products please visit us on [bythaiscaffold.com](http://bythaiscaffold.com)

### Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Certification: SGS
- Model Number: BM201
- Minimum Order Quantity: 100
- Price: 4.5-8.5
- Packaging Details: container
- Delivery Time: 15-25
- Payment Terms: TT/TC

### Product Specification

- Name: Scaffolding Coupler
- Feature: High Strength
- Material: Steel
- Package: Container
- Surface Treatment: Galvanized
- Application: Construction
- Standard: EN74-1
- Color: Silver
- Highlight: **SGS Silver Coupler Scaffolding, Steel Silver Coupler Scaffolding, Galvanized Scaffold Sleeve Coupler**

### Product Description:

#### Scaffolding Coupler

Scaffolding Coupler is a highly durable and reliable product designed to securely connect scaffolding tubes and create a stable structure for construction workers. It is an essential component in the construction industry, widely used in various projects such as building, bridge, and tunnel construction.

#### Product Overview

Scaffolding Coupler is made of high-quality steel materials, ensuring its strength and durability. It is designed to meet the EN74-1 standard, making it compatible with other scaffolding systems and fixtures. The coupler is also available in JIS Standard Couplings and British Scaffold Fixtures to meet specific project requirements.

#### Convenient Assembly

The Scaffolding Coupler is easy to assemble and disassemble, making it convenient for construction workers to set up and dismantle scaffolding structures. Its simple design allows for quick installation, saving time and effort on the job site.

#### Robust Construction

The Scaffolding Coupler is built with a robust construction to withstand heavy loads and provide a stable support system for workers. It is designed to securely connect scaffolding tubes and prevent any movement or displacement, ensuring the safety of workers and the stability of the structure.

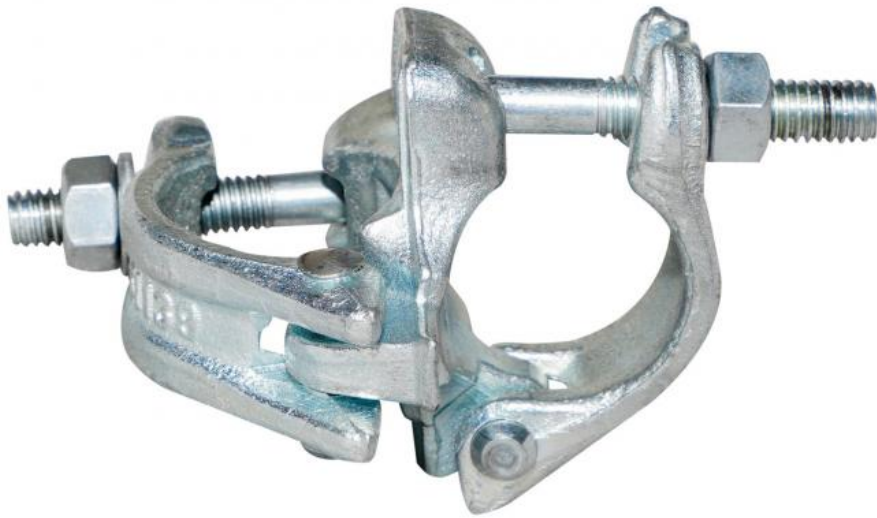

#### Package and Color

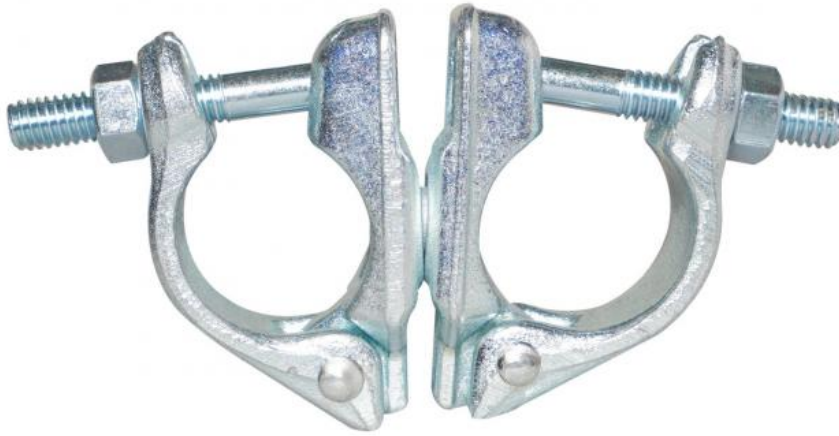

The Scaffolding Coupler is packaged in containers, making it easy to transport and store. The coupler comes in a silver color, providing a sleek and professional look to the scaffolding structure.

#### Conclusion

In conclusion, Scaffolding Coupler is an essential and reliable product in the construction industry. It meets the EN74-1 standard and is available in JIS Standard Couplings and British Scaffold Fixtures. Its high-quality steel material, convenient assembly, and robust construction make it a must-have for any construction project. Order now and experience the convenience and stability of Scaffolding Coupler.

### Features:

Product Name: Scaffolding Coupler

Application: Construction

Color: Silver

Material: Steel

MOQ: 1000

Name: Scaffolding Coupler

British-style Scaffold Connectors

Scaffold and Structure Connectors

Universal Scaffold Clamping Tools

### Technical Parameters:

<b>Product Name</b>	Scaffolding Coupler
<b>Material</b>	Steel
<b>Surface Treatment</b>	Galvanized
<b>Standard</b>	EN74-1
<b>Color</b>	Silver
<b>Package</b>	Container

<b>Application</b>	Construction
<b>Feature</b>	High Strength
<b>Scaffold Clamping System</b>	Yes
<b>High-Quality Japanese Scaffold Accessories</b>	Yes
<b>Steel Structure Scaffold Connectors</b>	Yes

### Applications:

Product Description - Scaffolding Coupler

Brand Name: **Scaffolding Coupler**  
Model Number: **BM201**  
Place of Origin: **China Tianjin**  
Certification: **SGS**  
Price: **\$4.5-8.5**  
Packaging Details: **In bundles**  
Delivery Time: **15-25 days**  
Payment Terms: **TT/TC**  
Surface Treatment: **Galvanized**  
MOQ: **1000 pieces**  
Application: **Construction**  
Material: **Steel**  
Standard: **EN74-1**

Scaffolding Coupler is a high-quality Japanese scaffold accessory designed to provide a secure and easy-to-use connection between scaffolding pipes. Made from Japanese steel, this product is known for its durability and long-lasting performance.

#### Application and Usage

Scaffolding Coupler is an essential manual scaffold connection tool that is widely used in construction sites. It is commonly used to connect two scaffolding pipes together, creating a sturdy and reliable structure for workers to perform their tasks on. The coupler is designed to fit various sizes of pipes, making it a versatile tool for different applications.

With its high-quality material and reliable performance, Scaffolding Coupler is suitable for use in a variety of construction projects, including building construction, bridge construction, and renovation work. It can also be used in industrial and commercial settings where temporary structures are required.

#### Features and Benefits

**High-Quality Japanese Scaffold Accessories** - Made from Japanese steel, Scaffolding Coupler is known for its high quality and durability.

**Secure and Easy to Use** - The coupler is designed to provide a tight and secure connection between scaffolding pipes, ensuring the safety of workers.

**Durable and Long-lasting** - With its galvanized surface treatment, Scaffolding Coupler is resistant to rust and corrosion, making it a long-lasting tool for construction projects.

**Versatile Applications** - The coupler can be used for various types of scaffolding pipes, making it suitable for different construction projects.

**Safe and Reliable** - Scaffolding Coupler is designed and manufactured according to the EN74-1 standard, ensuring its safety and reliability.

**Convenient Transportation** - The coupler is lightweight and can be easily transported to different construction sites, enhancing efficiency and productivity.

**Enhance Construction Efficiency** - By providing a secure and stable connection between scaffolding pipes, Scaffolding Coupler helps to enhance construction efficiency and safety.

With its high-quality material, secure connection, and versatile applications, Scaffolding Coupler is an essential tool for any construction project. Its convenience, durability, and safety make it a must-have for construction workers and contractors.

Order your Scaffolding Coupler today and experience the convenience and efficiency it brings to your construction projects!

## Customization:

### Customization Service for Scaffolding Coupler

Brand Name: Scaffolding Coupler  
Model Number: BM201  
Place of Origin: China Tianjin  
Certification: SGS  
Price: \$4.5-8.5  
Packaging Details: In bundles  
Delivery Time: 15-25 days  
Payment Terms: TT/TC  
MOQ: 1000 pieces  
Material: Steel  
Package: Container  
Name: Scaffolding Coupler  
Feature: High Strength

For customers who require a personalized solution for their scaffolding needs, our company offers a comprehensive customization service for our Scaffolding Coupler. Made from high-quality Japanese scaffold accessories and British couplers, our Scaffolding Coupler is a universal scaffold clamping tool that guarantees safety and stability on any construction site.

With our customization service, customers can choose from a range of options to suit their specific requirements. This includes selecting the desired material, packaging, and delivery time. Our Scaffolding Coupler is made from durable steel and can be packaged in containers for easy transport and storage.

In addition, we offer a variety of certifications and compliance standards, such as SGS, to ensure the quality and safety of our products.

Our pricing is competitive, ranging from \$4.5 to \$8.5 per piece, with a minimum order quantity of 1000 pieces.

Our experienced team is dedicated to providing high-quality products and excellent customer service. With our customization service, we strive to meet the unique needs of each customer and deliver a product that exceeds expectations. Trust in our Scaffolding Coupler for a strong and reliable scaffolding solution on your next construction project.
