

Galvanized Steel Clamp Double Clutch Swivel Coupler Scaffolding Fixed Clamp Scaffolding Clamps

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Certification: SGS ISO
- Model Number: BT205
- Minimum Order Quantity: 1000
- Price: 8.5-15.8
- Packaging Details: In bundles
- Delivery Time: 15-25
- Payment Terms: TT/TC

Product Specification

- Application: Construction
- Material: Steel
- Name: Scaffolding Coupler
- Color: Silver
- Feature: High Strength
- Surface Treatment: Galvanized
- Standard: EN74-1
- MOQ: 1000
- Highlight: **Galvanized Steel Scaffolding Coupler, Scaffolding Fixed Clamp, Double Clutch Swivel Coupler**

Product Description

Product Description:

Our Scaffolding Coupler is specifically engineered to facilitate the swift and secure joining of scaffold tubes, making it an indispensable tool for construction projects. The coupler's high-strength feature is a testament to its ability to withstand the rigorous demands of construction sites, providing a firm grip and a durable connection that ensures the safety of workers and the integrity of the structure. This product's strength is derived from its meticulous manufacturing process, which uses top-quality materials designed to endure heavy loads and resist wear and tear over time.

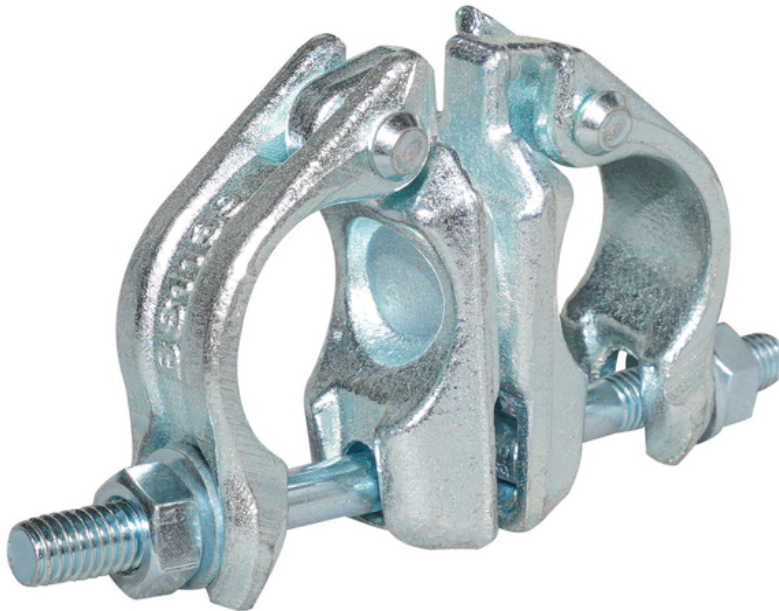

This versatile coupler is suitable for a variety of applications within the construction domain. It is commonly used to create scaffold frameworks, support systems, and temporary structures. The Scaffolding Coupler is compatible with both Japanese Steel Pipe Connectors and British Scaffold Tube Clamps, making it a universal solution that can adapt to different scaffolding systems around the world. The adaptability of the coupler allows for seamless integration with existing structures, minimizing compatibility issues and streamlining the construction process.

Our Scaffolding Coupler is not just about strength and compatibility; it also focuses on ease of use. The intuitive design enables quick and easy installation, saving valuable time on the job site. Construction workers can confidently secure scaffold tubes with minimal effort, ensuring a solid and safe connection every time. This efficiency does not come at the expense of safety, as each coupler is rigorously tested to meet and exceed industry standards.

Technical Parameters:

Attribute	Details
Name	Scaffolding Coupler
Color	Silver
Feature	High Strength
Application	Construction
Material	Steel
Package	Container
MOQ	1000
Standard	EN74-1
Surface Treatment	Galvanized

Applications:

The versatility of the scaffolding coupler allows it to be utilized across a broad range of construction scenarios. From residential building projects to large-scale commercial construction sites, the reliability and ease of use of this coupler make it an indispensable tool for builders and contractors. Its ability to swiftly connect and secure scaffolding parts makes it ideal for dynamic construction environments where time and safety are of the essence.
