Surface	Pre-galvanized/hot Dip Galvanized/Spray Plastic
Usage	Scaffolding
Material	Steel
Length	Customized
Features	Steel plank with hooks, steel frame for decking plank
Packaging	Container
Place of Shipment	China

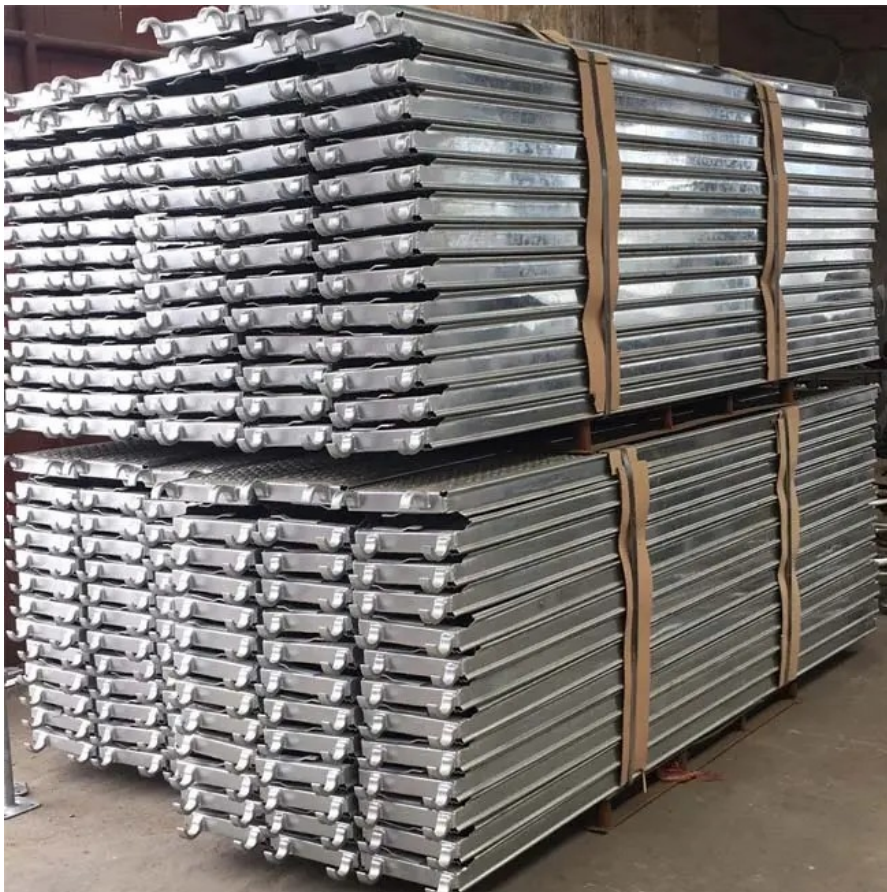

Applications:

One of the primary uses of the Bythai BT205 Scaffolding Plank is to create a safe and sturdy work platform for workers at various heights. Whether it's for building a new structure, repairing an existing one, or simply providing access to hard-to-reach areas, this product is an essential tool for any construction site.

Another common application for this product is as a steel frame for decking plank. By providing a solid base for decking, this product helps to prevent injuries and accidents caused by unstable or uneven surfaces. Additionally, it can be used to create temporary walkways and bridges, providing safe access to different areas of a construction site.

Thanks to its versatility, the Bythai BT205 Scaffolding Plank is suitable for use in a wide range of scenarios. It can be used in both indoor and outdoor environments and is designed to withstand harsh weather conditions, making it perfect for use in areas with extreme temperatures or high humidity levels.

The minimum order quantity for this product is 1000 units, and it is available at a price range of 15.5-85.5 per unit, depending on the quantity ordered. The product is packaged in bundles and delivered within 10-15 days of placing an order. Payment terms are container and shipping, and the product is shipped in containers from China. The length of the scaffolding plank can be customized according to the specific needs of the project.
