

## EN74-1 Standard Silver Steel British Coupler Manufacturers For Secure Construction Support

### Our Product Introduction

for more products please visit us on [bythaiscaffold.com](http://bythaiscaffold.com)

#### Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Certification: SGS
- Model Number: BT205
- Minimum Order Quantity: 1000
- Price: 8.5-15.8
- Packaging Details: In bundles
- Delivery Time: 15-25
- Payment Terms: TT/TC

#### Product Specification

- Standard: EN74-1
- Material: Steel
- Surface Treatment: Galvanized
- Package: Container
- Application: Construction
- Name: Scaffolding Coupler
- MOQ: 1000
- Color: Silver
- Highlight: **EN74-1 Steel British Coupler,  
Secure Construction Steel British Coupler,  
Silver Steel British Coupler**

## Product Description

### Features:

Product Name: Scaffolding Coupler

Package: Container

Name: Scaffolding Coupler

Application: Construction

Color: Silver

Feature: High Strength

Our Scaffolding Coupler is a high-quality Japanese scaffold accessory that is a universal scaffold clamping tool. It is made to JIS standard couplings and is perfect for any construction project. With its high strength, it is sure to get the job done right.

### Technical Parameters:

Material	Steel
Name	Scaffolding Coupler
Feature	High Strength
Package	Container
Standard	EN74-1
Application	Construction
Surface Treatment	Galvanized
Color	Silver
MOQ	1000

These Scaffolding Couplers are also known as British Scaffold Tube Clamps, Steel Structure Scaffold Connectors, and BS EN 74 Scaffold Accessories.

### Applications:

The scaffolding coupler is designed to provide a secure and reliable connection between scaffolding tubes. It is made from high-quality materials and features a silver color. The coupler is compatible with Japanese steel pipe connectors and JIS standard couplings, making it a versatile product that can be used in a variety of construction applications. Its high strength ensures that it can withstand heavy loads and harsh weather conditions.

The scaffolding coupler is ideal for use in a range of construction scenarios, such as building renovation, high-rise construction, and bridge construction. It is particularly useful in situations where a secure and stable scaffold is required, such as when working at heights or in adverse weather conditions. The product is easy to install, making it a popular choice for construction professionals looking to save time and increase efficiency.

The scaffolding coupler is a popular product in the construction industry, and its application occasions are numerous. It can be used in scaffolding systems, support structures, and other construction applications that require a strong and reliable connection between tubes. The product is well-suited for use in both commercial and residential construction projects.

In summary, the scaffolding coupler model BT205 is a versatile and reliable product that is ideal for use in a wide range of construction scenarios. Its high strength, compatibility with Japanese steel pipe connectors and JIS standard couplings, and easy installation make it a popular choice for construction professionals. It meets the highest quality standards and is certified by SGS, ensuring that customers receive a product that is both safe and reliable.
