

## Corrosion Resistant Steel Scaffolding Plank Customizable Length for Construction Projects

Our Product Introduction

for more products please visit us on [bythaiscaffold.com](http://bythaiscaffold.com)

### Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS,ISO
- Model Number: BT205
- Minimum Order Quantity: 1000
- Price: 15.5-85.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: container, shipping

### Product Specification

- Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic
- Material: Steel
- Usage: Scaffolding
- Place Of Shipment: China
- Length: Customized
- Packaging: Container
- Highlight: **Construction Projects Steel Scaffolding Plank, Customizable Length Steel Scaffolding Plank, Corrosion Resistant Steel Scaffolding Plank**

## Product Description

### Product Description:

Our steel planks are made from high-quality steel materials that are sturdy and long-lasting. It is designed to withstand harsh weather conditions and heavy loads, making it the perfect choice for your construction needs. The steel plank is designed with hooks that are compatible with scaffolding systems, ensuring a secure and stable platform for workers to operate on.

The steel plank is available in customized lengths to suit your specific needs and requirements. Whether you need a shorter or longer plank, we can provide you with the perfect fit. Our steel planks are packaged in containers to ensure safe and secure delivery to your location.

Our steel plank is manufactured in China, ensuring high-quality standards and competitive pricing. It is a cost-effective solution for your scaffolding needs, providing you with a safe and secure working platform without breaking the bank.

In summary, our steel plank for ringlock and scaffold systems is a durable and safe solution for your construction needs. Available in various surface treatments and customized lengths, it is a cost-effective solution that can withstand harsh weather conditions and heavy loads. Packaged in containers and manufactured in China, our steel plank is the perfect choice for your scaffolding needs.

### Features:

Product Name: Scaffolding Plank

Usage: Scaffolding

Length: Customized

Packaging: Container

Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic

Place of shipment: China

Keywords: scaffolding steel walking planks hook, scaffolding steel plank, bs1139 steel plank

### Technical Parameters:

|                   |                                                                                      |

| Product Name      | Steel Scaffolding Plank                                                              |
| Packaging         | Container                                                                            |
| Usage             | Scaffolding                                                                          |
| Length            | Customized                                                                           |
| Material          | Steel                                                                                |
| Place of Shipment | China                                                                                |
| Surface           | Pre-galvanized/hot Dip Galvanized/Spray Plastic                                      |
| Description       | Steel planks w/hook, suitable for use in galvanized steel scaffolding plank systems. |

### Applications:

The Bythai BT205 scaffolding steel plank is certified by SGS and ISO, which means that it has undergone rigorous testing and meets international quality standards. This guarantees that the product is safe to use and can be relied upon for its strength and durability. The minimum order quantity for this product is 1000 units, with a price range of 15.5-85.5.

This product is shipped in container packaging and has a delivery time of 10-15 days. Payment terms are container and shipping, making it easy and convenient for customers to purchase. The steel plank is equipped with hooks that make it easy to attach to scaffolding frames, ensuring that it stays in place and provides a stable platform for workers.

The Bythai BT205 scaffolding steel plank is perfect for a variety of applications and scenarios. It is commonly used in construction sites, building renovations, and other projects that require workers to work at heights. The galvanized steel scaffolding plank is designed to provide a safe and stable working platform, making it an essential tool for any construction project. The steel plank with hooks ensures that the platform stays in place, providing a safe and reliable working surface for workers.

Overall, the Bythai BT205 scaffolding steel plank is a high-quality product that is made to meet international quality standards. It is durable, reliable, and designed to provide a safe and stable working platform for workers. Whether you are working on a small renovation project or a large construction site, this product is perfect for your needs.
