

Customizable Steel Scaffolding Plank with Pre Galvanized Surface

Our Product Introduction

for more products please visit us on bythaiscaffold.com

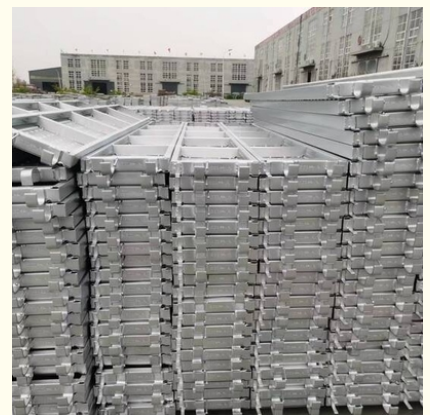

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS,ISO
- Model Number: BT205
- Minimum Order Quantity: 1000
- Price: 15.5-85.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: container, shipping

Product Specification

- Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic
- Packaging: Container
- Usage: Scaffolding
- Material: Steel
- Length: Customized
- Place Of Shipment: China
- Highlight: Customizable Scaffolding Plank,
Steel Scaffolding Plank,
Pre Galvanized Scaffolding Plank

Product Description

Product Description:

Our Steel Plank with Hook is specially designed for scaffolding use, featuring hooks on both ends to securely fasten to the scaffolding frames. The hooks ensure that the plank stays in place, providing a stable working platform for workers to stand on.

This Galvanized Steel Plank Catwalk is available in three surface finishes: Pre-galvanized, Hot Dip Galvanized, and Spray Plastic. Pre-galvanized planks are coated with a layer of zinc to prevent rusting, making them ideal for outdoor use. Hot Dip Galvanized planks are submerged in molten zinc, creating a thicker, more durable layer of protection against corrosion. Spray Plastic planks are coated with a layer of plastic, providing a non-slip surface and added protection against wear and tear.

Our Steel Planks w/Hook are sourced from China, ensuring high-quality materials and manufacturing processes. They are packaged in containers, ensuring safe and secure transport to your construction site.

Whether you are building a high-rise building or a small home, our Scaffolding Plank is an essential tool for any construction site. The sturdy design and durable steel material ensure that workers can safely navigate the site, reducing the risk of accidents and injuries.

Features:

Product Name: Scaffolding Plank

Usage: Scaffolding

Surface:

Pre-galvanized

Hot Dip Galvanized

Spray Plastic

Material: Steel

Length: Customized

Packaging: Container

Our Scaffolding Plank is a durable and versatile option for your scaffolding needs. Made from galvanized steel, our steel planks w/hook are designed to withstand heavy loads and harsh weather conditions. Choose from pre-galvanized, hot dip galvanized, or spray plastic surface finishes to fit your specific needs. With customizable lengths and packaging in containers, our steel plank product is the perfect solution for your scaffolding project.

Technical Parameters:

Product Attribute	Value
Product Name	Steel Planks with Hooks
Material	Steel
Length	Customized
Surface	Pre-galvanized/hot Dip Galvanized/Spray Plastic
Packaging	Container
Place of Shipment	China
Usage	Scaffolding

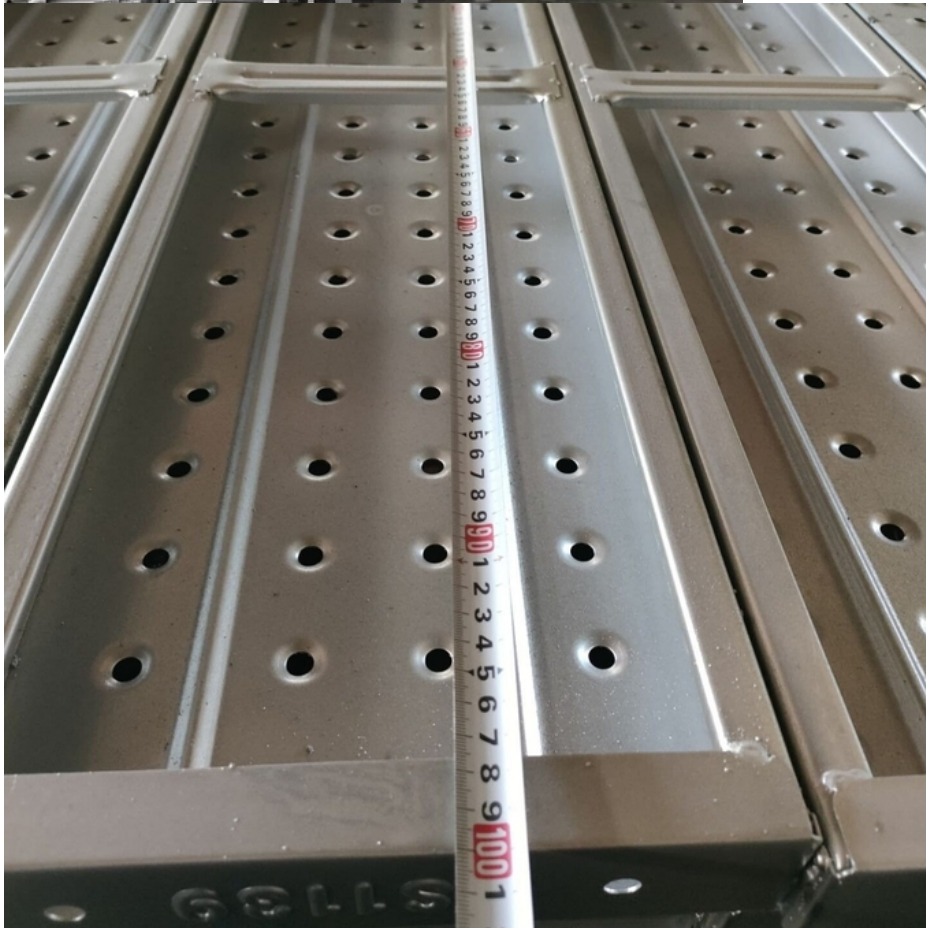

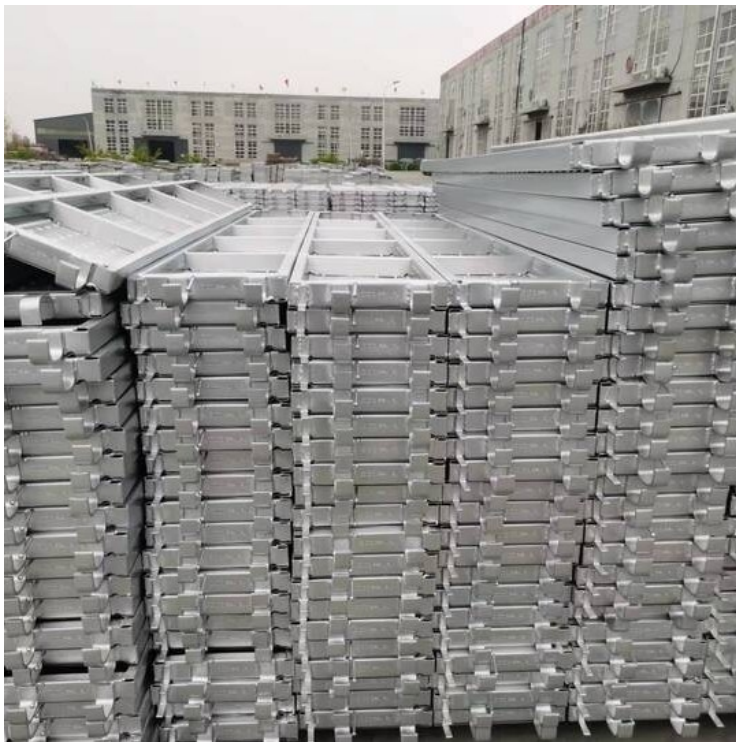

Applications:

The steel frame for decking plank is pre-galvanized or hot-dip galvanized, which provides an added layer of protection against corrosion and rust. The hooks on the planks ensure that they can be securely fastened to the scaffolding structure, preventing any accidents or slips.

The Bythai BT205 scaffolding planks have been certified by SGS and ISO, ensuring their quality and safety standards. The minimum order quantity for these planks is 1000, and they are priced between \$15.5 and \$85.5, depending on the surface finish and length. The planks are packaged in bundles for easy storage and transportation and can be delivered within 10-15 days from the date of order. Payment terms include container and shipping options, making it convenient for customers to choose the most suitable option for their project.

These galvanized steel planks are ideal for a range of construction projects, including building renovation, painting, and maintenance works. They can be used as temporary work platforms, walkways, and bridges, providing a safe and stable surface for workers to carry out their tasks.

The Bythai BT205 scaffolding planks are manufactured in China and shipped from there. With their robust design and high-quality material, these steel planks w/hook are a reliable and cost-effective solution for any scaffolding project.
