

oEM Scaffolding Parts 100% Aluminum Decking Boards For America

Basic Information

• Place of Origin: China • Brand Name: bythai SGS · Certification: • Model Number: BS204 • Minimum Order 100 Quantity: 4.5-8.5 • Price: · Packaging Details: container • Delivery Time: 10-15

Product Specification

• Payment Terms:

• Type: Planks

• Size: Various Sizes Available

Application: Construction, Maintenance, Repair

TT/TC

• Standard: EN39/BS1139

• Usage: Construction, Maintenance, Repair

Oem: Available
Packing: Container
Material: Aluminium
Anti-Slip: Yes
Width: 0.24m

Surface Treatment: AnodizedCorrosion Resistance: High

Surface: Aluminum

Product Description

100% Aluminum Decking Boards: The Strong, Safe, and Lightweight Scaffolding Solution for America's Construction Sites Upgrade your scaffolding with 100% aluminum decking boards!

Built for the demands of construction projects across the USA, these decking boards offer unmatched durability, safety, and ease of use. Whether you're a contractor, professional builder, or DIY enthusiast, experience the difference aluminum decking boards can make on your next project.

Features:

Unbeatable Strength & Lightweight Design: Crafted from high-quality aluminum, these boards offer exceptional weight capacity. while remaining easy to transport and maneuver.

Built to Last: Aluminum's inherent rust resistance ensures long-lasting performance, even in harsh weather conditions.

Safety First: Slip-resistant surfaces minimize the risk of falls, prioritizing worker safety on the job site.

Seamless Integration: Designed to work flawlessly with most major scaffold systems commonly used in America.

Multiple Sizes Available: Choose from a variety of decking board sizes to find the perfect fit for your scaffolding needs.

Faster Assembly & Disassembly: Lightweight design and easy handling expedite setup and breakdown times, saving you valuable time and labor costs.

Enhanced Worker Safety: Slip-resistant surface reduces fall hazards.

Improved Efficiency: Faster assembly and disassembly minimize downtime.

Reduced Transportation Costs: Lightweight design makes transportation easier and more economical.

Long-Term Investment: Durable aluminum construction ensures years of reliable use.

| Keyword | | Description | |
| Construction safety | | Designed to ensure safe and secure construction work | |
| Lightweight plank | | Made with lightweight aluminum for easy transportation and assembly | |
| Safety design | | Incorporates safety features to prevent accidents and injuries | |
| Convenient transportation | | Packed in containers for convenient transportation to different locations | |
| High efficiency | | Efficient and time-saving assembly process for increased productivity | |

Applications:

Aluminum planks- bythai Product Description The Aluminum planks, model BS204, is a high-performance scaffolding system designed and manufactured by bythai in China. It is certified by SGS and meets international standards such as EN12810, AS/NZS 1576, ANSI/SSFI SC100-5/05, and BS1139. This versatile system is suitable for various sizes and applications, making it the perfect choice for construction, maintenance, and repair projects. Key Features

Strong and durable aluminum material
Easy installation with minimal tools required
Efficient and safe for construction workers
Versatile for various sizes and applications
Compliant with international standards
Plank accessories for added convenience

bythai - providing high-quality scaffolding solutions since 2005

Customization:

Features:

Safety Design: Our Aluminum Ringlock System is designed to ensure construction safety and prevent accidents.

High Strength: Made of high-quality aluminum material, our system is strong and can withstand heavy loads.

Easy To Assemble: With a simple and efficient design, our system can be easily assembled and disassembled, saving time and labor costs.

Versatile: Our system can be used for various types of construction projects, making it a versatile choice for contractors.

Durable: The aluminum material used in our system is corrosion-resistant and can withstand harsh weather conditions, making it long-lasting and cost-effective.

Lightweight: Compared to traditional scaffolding systems, our aluminum ringlock system is lightweight, making it easier to transport and install

Cost-effective: Our system is competitively priced and designed to help contractors save on construction costs.

Flexible: The interchangeable components of our system allow for flexibility in design and can adapt to different construction needs.

Safe: Our Aluminum Ringlock System is designed to meet safety standards and ensure the safety of workers.

Stable: The sturdy design of our system provides stability and support for workers and materials.

Efficient: With its easy assembly and versatile design, our system can improve construction efficiency and productivity.

Environmentally Friendly: Made of recyclable aluminum material, our system is environmentally friendly and sustainable.

Interchangeable: The components of our system can be easily interchanged and used for different purposes, providing flexibility and convenience for contractors.

Adjustable: Our system can be adjusted to fit different construction heights and requirements, providing versatility in design.

Multi-functional: Our Aluminum Ringlock System can be used for various types of construction projects, making it a multi-functional choice for contractors.

Packing and Shipping:

Packaging and Shipping

The Aluminum Ringlock System is packaged and shipped securely and efficiently to ensure the safe arrival of the product to its final destination

Packaging:

The components of the Aluminum Ringlock System are carefully packed in strong and durable wooden crates or cartons.

Each crate or carton is labeled with the product name, quantity, and any necessary handling instructions.

Special packaging can be arranged upon request.
